

ICL-IP Product Stewardship Policy

Israel Chemicals Limited Industrial Products (ICL-IP) is an international producer and marketer of industrial and specialty chemicals and a world leader in the field of the production of Bromine and Bromine derivatives.

At ICL-IP we are committed to Responsible Care as part of ICL-IP policy and operations, promoting a Product Stewardship program which incorporates health, safety and environmental considerations in all stages of our products' life cycle. Within the framework of this program we will act to protect human health and the environment by maintaining high production and operation standards while controlling and reducing the industrial emissions to reach a sustainable production and use of our products.

Within this framework we are committed to:

- Comply with all applicable National and International regulatory requirements and other requirements to which we subscribe
- Regularly assess and responsibly manage products risk throughout their supply chain.
- Integrate Health, Safety and Environmental aspects in product and process design and development.
- Maintain and provide complete and up-to-date records and appropriate safety, health and environmental data on all chemicals handled, including raw materials, intermediates, finished products and waste streams.
- Provide appropriate training and information to customers and distributors on the safe and responsible use and handling of our products to prevent emissions to air and water and to reduce waste to the environment.
- Proactively cooperate with our customers to develop systems for controlling, monitoring and reducing the health and environmental impacts associated with the use of our products in their manufacturing processes.
- Work with and assess raw material suppliers and contractors involved in transport, storage, distribution and toll manufacturers on their safety policy standards and performance to achieve reliable operation of environment protection and industrial hygiene.
- Set objectives and targets for the ongoing improvement of environmental and health protection.

ICL-IP management is committed to the Product Stewardship Program, will allocate the needed resources and will take these responsibilities as a first priority for achieving its objectives.
